

WALTERDALE BRIDGE REPLACEMENT

Concept Planning Study Open House

The Walterdale Bridge has served Edmonton for nearly 100 years and is reaching the end of its structural life. The bridge spans the North Saskatchewan River at 105 Street. Previously completed bridge condition assessments indicate that the bridge should be replaced by 2014. In response, the City of Edmonton is developing conceptual plans for a replacement “signature” bridge that will complement its location in the river valley and as a gateway to Rosssdale and Downtown.

WEST ROSSDALE URBAN DESIGN PLAN IMPLEMENTATION

Public Meeting

The City of Edmonton has developed an amendment to the Rosssdale Area Redevelopment Plan and a number of associated Direct Control Zones that would implement the West Rosssdale Urban Design Plan. Together, the amendment and zoning are intended to guide the redevelopment and revitalization of the West Rosssdale area. Specifically they will allow for the creation of a complete, diverse urban village, while commemorating and respecting the history of the area.
